FIT AND SECURE

2.1

Assemble the Front and Rear Foot Rails (Items 1 & 2) using the Joiner Plate (Item 12), M6 x 16 Button Head Bolts and M6 Nyloc Nuts (Items 13 & 14) as shown. Fully tighten.

Place M6 Nut Caps (Item 11) over the Nyloc Nuts.

Tightening Torque:

M6 : 8-10Nm / 5.9 ft lb - 7.38 ft lb

2.2

Measure 50mm forward from the mark on the Ditch trim and make a mark, do this on both LH / RH ditch trims.

Place the foot rail on the vehicles roof, align the rear slot centre with the mark you made and mark the remaining centres. Do this on both the LH & RH side.

2.3

TIP:

Place tape around the drill to mark a depth of 10mm, take care as there are airbags and canisters below.

Drill the holes you marked, starting with a 6mm pilot hole before opening to a 12mm hole. There is no need for a lot of downward pressure. Let the drill do the work.

Remove +/- 5mm of the mastic around the holes drilled using a sharp knife to allow the Jack nut to fully seat onto the metal as shown in diagram A.

Clean the area around the holes drilled using a rag and denatured alcohol. Apply anti-rust around all the holes.

2.4

Insert a M6 x 30 Button Head Bolt (Item 16) into the Jack Nut Tool (Item 15) and loosely fit a Jack Nut (Item 5) to the button head bolt as shown.

Using the Jack Nut Tool and a M6 x 30 button head bolt, set the M6 jack nut into both the holes, opened in step 2.2.

Using a cordless driver and a 4mm allen cordless bit, set the jack nut into the hole while holding the Jack Nut Tool, to prevent the Jack Nut from turning.

2.5

Tightening Torque:

M8 : 15-20Nm / 11.06 ft lb - 14.75 ft lb

Place silicone around and over all the Jack nuts to insure a waterproof seal.

Place the spacers (Item 3) in the vehicles ditch, aligning the the spacers with the holes in the vehicles roof.

Place a bead of silicone along the threads of the M6 x 25 Hex Bolts and secure the rail using M6 x 25 Hex Bolts and M6 x 19 x 1 Flat Washers (Items 4 & 6).

Place M6 Nut Caps (Item 11) over all hex bolts.

3

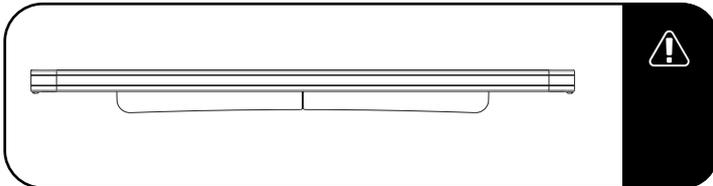

FIT AND SECURE

3.1

Refer to RRSUNI when assembling your Slimline II Tray.

3.2

Make sure that the wind deflector is installed before you proceed to the next step.

3.3

Fit your roof rack to the Foot Rails using M8 x 20 Hex Bolts, M8 x 16 x 1.6SS Flat Washers and M8 Nyloc Nuts (Items 7, 9 & 10) as shown.

3.4

Center the rack and fully tighten all fasteners. Use M8 Nut Caps (Items 10) to finish off the nuts.
