2.1

Consider the following before installing the fridge slide cage.

The fridge slide cage works with FSLI020.

The overall dimensions of the cage is 733(L) x 561(W) x 577(LH)/607(MH) & 637(HH)mm on the low, medium & high setting.

Determine which height setting is best suited for your fridge and install area using the 3 height measurements listed above as a guide, refer to step 2.6 - 2.11 to determine which height is required.

2.2

Consider the clearance area needed around the cage as shown in step 2.2. Check rear seat angle and adjust if possible and required.

CAUTION: For vehicles with a rear hatch, slowly lower the hatch to confirm the cage is clear from the hatch glass or any plastic trim panels.

Place the fridge slide in the desired position, measure the offset and height setting needed as shown in step 2.1 from the front of the fridge slide to ensure that the cage will not interfere with your tailgate/boot door, these are the minimum requirements for the length x depth x height needed to mount the fridge slide.

2.3

Follow the fitment guide for FSLI020, to fit the fridge slide.

Once the fridge slide has been positioned and fitted, you will need to remove the fridge slide before moving on to the fridge cage assembly.
