2.1

With the help of a friend, hold the Foot assemblies on top the spare wheel as shown. Place the Universal Tray (Item 1) on the Foot Assemblies (Item 2) and centralize on the wheel. Mark the holes on the Tray that best suit the desired height of the tray, as well as the wheel size.

2.2

On a suitable surface, lay the Universal Tray (Item 1) facing down. Loosely assemble the two Foot Assemblies (Item 2) to the outside of the Tray using four M8 x 16 Button Head Bolts and four M8 Nyloc Nuts (Items 3 & 4).

Tighten all fasteners and place M8 Nut Caps (Item 5) on all M8 Nyloc Nuts.

Tightening Torque:

M8 : 15-20Nm / 11.06 ft lb - 14.75 ft lb

2.3

Feed the non-ratchet end of the Ratchet Strap (Item 6) over and around the first pin on one Foot and then around the same pin on the second foot. Place the shelf on the wheel and loop the strap around the wheel. Tighten the strap using the ratchet and ensure that the strap is tight enough to not slip when weight is applied.

Check that the shelf is level and centralized on the tire, that it is snug and that nothing interferes with the operation of the wipers etc.
