Before you start with the fitment of the Foot Rails (Items 1 & 2), you need to remove the factory roof rails.

Do this by unclipping and removing the front, middle and rear plastic caps of the roof rail.

Now loosen the two bolts in the front, one bolt in the middle and two bolts at the rear of the roof rail.

After you have removed all the bolts, remove the roof rails from the vehicle.

In the middle of the ditch you will see a sealing plug, this will also need to be removed as shown.
